

## Author Index Volume 88 (1997)

- Abou-Dina, M.S. and F.M. Hassan**, Generation of waves by a moving plate in stratified shallow water 239–253
- Agarwal, R.P.**, see **Wong, P.J.Y.** 15–43
- Agarwal, R.P.**, Preface 1–2
- Agarwal, R.P. and F.-H. Wong**, Existence of positive solutions for non-positive higher-order BVPs 3–14
- Agarwal, R.P. and D. O'Regan**, Positive solutions to superlinear singular boundary value problems 129–147
- Anderson, D., R. Avery and A. Peterson**, Three positive solutions to a discrete focal boundary value problem 103–118
- Avery, R.**, see **Anderson, D.** 103–118
- Bainov, D. and P. Simeonov**, Positive solutions of a superlinear first-order differential equation with delay depending on the unknown function 95–101
- Baxley, J.V. and S.B. Robinson**, Nonlinear boundary value problems for shallow membrane caps, II 203–224
- Beghdadi, D. and P. Maroni**, On the inverse problem of the product of a semi-classical form by a polynomial 377–399
- Cheung, L.-F., C.-K. Law and M.-C. Leung**, Uniqueness of positive solutions to the rotationally symmetric  $p$ -harmonic map equations 45–56
- De Meyer, H.**, see **Ixaru, L.Gr.** 289–314
- Diblik, J.**, Positive and oscillating solutions of differential equations with delay in critical case 185–202
- Drici, Z.**, see **Lakshmikantham, V.** 175–184
- Elnagar, G.N. and M.A. Kazemi**, Pseudospectral Legendre-based optimal computation of nonlinear constrained variational problems 363–375
- Eloe, P.W.**, Positive solutions of boundary-value problems for difocal ordinary differential equations 71–78
- Exton, H.**, New hypergeometric identities arising from Gauss's second summation theorem 269–274
- Franco, D. and J.J. Nieto**, Maximum principles for periodic impulsive first order problems 149–159
- Furusho, Y. and K. Takaši**, Positive entire solutions to nonlinear biharmonic equations in the plane 161–173
- Guenther, R.B. and J.W. Lee**, Heat conduction with radiating boundary conditions 119–124
- Hassan, F.M.**, see **Abou-Dina, M.S.** 239–253
- Henderson, J. and W. Yin**, Singular  $(k, n - k)$  boundary value problems between conjugate and right focal 57–69
- Ixaru, L.Gr., H. De Meyer and G. Vanden Berghe**, CP methods for the Schrödinger equation revisited 289–314
- Kazemi, M.A.**, see **Elnagar, G.N.** 363–375
- Lakshmikantham, V. and Z. Drici**, Positivity and boundedness of solutions of impulsive reaction–diffusion equations 175–184
- Law, C.-K.**, see **Cheung, L.-F.** 45–56
- Lee, J.W.**, see **Guenther, R.B.** 119–124
- Leung, M.-C.**, see **Cheung, L.-F.** 45–56
- Ma, W. and Y. Takeuchi**, Stability analysis on a predator–prey system with distributed delays 79–94
- Maroni, P.**, see **Beghdadi, D.** 377–399
- Maya, C. and R. Shivaji**, Instability of nonnegative solutions for a class of semilinear elliptic boundary value problems 125–128
- Miekkala, U.**, Remarks on waveform relaxation method with overlapping splittings 349–361
- Nieto, J.J.**, see **Franco, D.** 149–159
- O'Regan, D.**, see **Agarwal, R.P.** 129–147
- Palumbo, B.**, A generalization of some inequalities for the gamma function 255–268
- Pao, C.V.**, Asymptotic behavior of solutions of reaction–diffusion equations with nonlocal boundary conditions 225–238
- Peterson, A.**, see **Anderson, D.** 103–118
- Ponnusamy, S.**, Close-to-convexity properties of Gaussian hypergeometric functions 327–337
